Uat URL: https://tvsapp.unfyd.com/UNFYD-CRM/Login.aspx
Production URL: https://tvsaa.unfyd.com/CRM/Login.aspx
Team Size: 8

Description: Auto Assist is a unique solution, which addresses the processes of Roadside Assistance & managed business of TVS. The solution functions across the areas of CRM, Ticketing and Field Service. It is basically managing the services assign to ASPs like mechanic or towing which is assign by CRM executive of particular command center. Mechanics are mapped against the ASPs. Base on this, a Ticket is generating for the ASP then notification fired to mapped mechanics then one of them will pick the case. Activities from started to break down location to either reached dealer/garage/customer prefer location will be performed. Once the all activities are performed, the service status will be successful and ASP status will be end trip and the case also will be closed. All closed cases transfer to TVS ASP Portal for payment for this a separate windows service is running which perform many operations based on configured threads and time interval,
