

Arpit Mehta

Senior Software Developer - 20 Years Experience

+919769223103
76.arpit@gmail.com

OBJECTIVE

Experienced Senior Software Developer proficient in Node.js, MSSQL, MySQL, and .NET, seeking challenging opportunities to contribute technical expertise and leadership skills in developing innovative software solutions.

SUMMARY

Dedicated Senior Software Developer with over 20 years of experience in designing, developing, and deploying software applications. Proficient in various programming languages and technologies, including Node.js, MSSQL, MySQL, and .NET framework. Proven track record of delivering high-quality software solutions within specified timelines and budget constraints. Strong analytical and problem-solving skills with a keen eye for detail.

EXPERIENCE

Retail10x, CA, USA (Remote) – Sr. Software Developer, NodeJS

March 2014 - PRESENT

Lead the design and development of scalable web applications using Node.js, Express.js

Collaborate with cross-functional teams to gather requirements, analyze user needs, and propose technical solutions.

Utilize MSSQL and MySQL databases for efficient data storage, retrieval, and manipulation.

Implement RESTful APIs for seamless integration between front-end and back-end systems.

Conduct code reviews, provide constructive feedback, and mentor junior developers to foster their professional growth.

Optimize application performance and troubleshoot issues to ensure smooth operation in production environments.

Stay updated with emerging technologies and industry best practices to enhance the software development process.

Effectively designing, developing, implementing the workflow program, presentation and handling various phases of interface development based on technical specification

Worked on AWS Lambda using trigger and schedule functionality

Managing the product team and complex data to deliver actionable insights to retailers & suppliers

SKILLS

Nodejs, MSSQL, MYSQL, ElasticSearch, AWS Lambda, S3, ASP.net, Jira and Bitbucket
Knowledge of PowerBI

Strengths

Creating APIs using ASP.net/Nodejs and SQL Server. Working on Lambda functions.

Abilities in mapping the client's requirements and translating them into functional specifications, custom designing solutions, development of applications & troubleshooting for complex software & application problems.

Efficiently implementing software development systems involved in the design and development of modules.

Undertaking code review, debugging, and troubleshooting

A team player with strong communication, analytical, logical, and problem-solving skills

Education

B.Sc. (Mathematics) – 2001
Mumbai University

Software Development
(GNIIT), Mumbai

Creating Basket Analysis including but not limited to building solutions to extract, analyze & monetize POS data for retailers up to 100k baskets per day in real-time
Delivering an advanced analytics platform to increase shopping trips and basket size for retailers

WiifMe, CA, USA (Remote)— *Software Developer*

March 2012 - February 2014

Responsible for design & development cycle of mobile and web application, including the video chat component using third-party application (e.g., open Tok)
Responsible for the creation, review, and execution of database guidelines, database specifications, validations, data handling conventions, to ensure conformance with database structure as per the requirements
Developed a strong relationship with the clients by providing efficient, effective and quick customer support.

WebMark International, Dubai, UAE — Software Developer

October 2003 - March 2012

Responsible for the design & development cycle of mobile and web applications for various projects.

Responsible for the creation, review, and execution of database guidelines, database specifications, validations, data handling conventions, to ensure conformance with database structure as per the requirements

Responsible for providing appropriate technical know-how and advantages of using the product to client
